

D2PCR™ Buffer

The D2PCR™ Buffer for direct-to-PCR applications combined with ultrafast thermocyclers allows genotyping in < 1 hour

Ready-to-use PCR templates

The D2PCR™ Buffer is designed to offer a rapid and simple protocol for generating ready-to-use PCR templates. These templates can directly be used for the subsequent PCR without any further processing of the DNA.

The D2PCR™ Buffer is compatible with ViennaLab singleplex and multiplex RealFast™ Assays.

When used with RealFast™ Assays and combined with ultrafast cycling on the MIC*) qPCR Cycler, complete genotyping from drawing blood to final result can be accomplished in less than 1 hour. Moreover, RealFast™ Assays can be run on D2PCR™ Buffer templates also on various common real-time PCR instruments.
